Official

IN THE CLAIMS:

Please amend the claims as follows:

A marked up copy of each amended claim pursuant to 37 CFR § 1.121(c)(1)(ii) appears on the page immediately following the amended claim.

16.   (Amended) A computer program product comprising:

a computer program processable by a computer system for causing the computer system to:

receive a search term and an identifier associated with a bookmark;

search a database coupled to the computer system using the search term; and

search a website associated with the bookmark using the search term; and

an apparatus from which the computer program is accessible by the computer system.

MARKED UP COPY OF AMENDED CLAIM 16

PURSUANT TO 37 CFR § 1.121 (c)(1)(ii)

16.   (Amended) A computer program product comprising:

a computer program processable by a computer system for causing the computer system to:

receive a search term and an identifier associated with a bookmark;

search a database coupled to the [computing device] computer system using the search term; and

search a website associated with the bookmark using the search term; and

an apparatus from which the computer program is accessible by the computer system.

ADDITION OF NEW CLAIMS 21 AND 22 PURSUANT TO 37 CFR § 1.121(C)(1)(i)

Please add the following new claims:

21.   (New) A method for searching websites associated with bookmarks comprising:

receiving a search term and an identifier associated with a bookmark;

accessing a file that includes the bookmark;

creating the identifier in response to accessing the file;

providing the search term and the identifier associated with the bookmark to a search engine;

searching a database using the search term; and

searching a website associated with the bookmark using the search term.

22.   (New) A system for searching websites associated with bookmarks comprising:

a computing device for:

receiving a search term and an identifier associated with a bookmark;

causing a file on a remote device that includes the bookmark to be accessed;

causing the identifier to be created in response to the bookmark file being accessed;

providing the search term and the identifier associated with the bookmark to a search engine;

searching a database coupled to the computing device using the search term; and

searching a website associated with the bookmark using the search term.
